

## The Best Solution for Learning with right Technology from Experts with Convenience and Affordability

**Learning from Anywhere-Anytime**

**Cost Effective**

**Centralized Resource**

**Easy Administration and Customization**

# About e-Learning

The advancement of technology and the growth and outreach of internet has opened new and exciting ways in teaching and research. It is now possible to continue learning without the limitation of location or time. **e-Learning** system developed by Web4inc provides robust environment for content management and sharing of resources, learning technologies and improving skills. It can be used to acquire the real world skills, or to enhance knowledge in your field of work. **e-Learning** offers complete solution for creation of online course and classes, learner registration, also includes tools for rapid and easy content development and administration. **e-Learning** enables the instructors to create virtual classrooms, learners to do web conferencing, both synchronous and asynchronous, create meeting and bulletin boards. Easy and intuitive tools are available for quick access to learning materials, tutorials, and external online resources. **e-Learning** provides faster learning at reduced costs, increased access to learning resources, and immediate personal and professional gains. Web4Inc(a division of netGuru Inc), has created a system that is far more capable and easier to use than any other system currently in the market.

## e-Learning Advantages

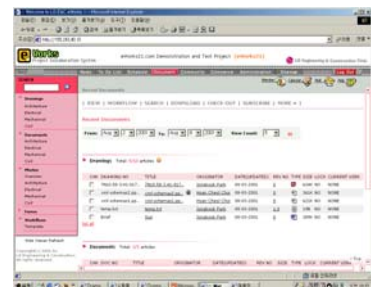

**e-Learning** system offers rich and powerful tools for the instructors and experts to build courses, share their resources with ease of operation and presentation. Simple and intuitive tools enables experts and content developers to launch their valuable resources to anywhere-anytime. e-Learning extends the much beyond the simple content access and presentation, with rich tool set for complete learning experience.

- Full blown content management system to manage multiple documents and formats by the instructor.
- Tools for Content organization into data libraries and folders.
- Online course registration and instructor assignment.
- Ease of class creation and administration by the course instructor. Class status (open or close) control by instructor.
- Online student registration to classes.
- Audio/video and Chat capability for online collaboration and conferencing.
- Integrated viewer for view and annotation of tutorials
- Email for communication and collaboration
- Schedule and Calendar to effective management of schedule.
- Online class Announcements, discussion boards and forums.
- Rich set of tools for site administration, Access control functions for course and class administrations.
- Enterprise wide deployment with seamless integration with enterprise administrative systems and authentication.

## Resource Management

E-learning Resource Management System (EMS) provides simple tools for sharing and distributing the contents . The content can be organized into resource folders which be easily created and named.

- Dynamic Course and Class Management
- A strong search engine (Keyword, Full Text Search)
- A fast upload/download module that enables the handling of a large number of learning resource(s)
- A strong sorting and filtering functionality
- Locking the material based on department access and maintaining the log details
- Instructors can create pages for web links for external reference

[ Online Library ]

# Powerful Web Class Room

e-Learning is the only solution that provides for virtual classroom for online instruction and teaching. This can be with interactive participation of the learner or in passive mode where the learner gets the web cast of the live training session.

- A Java based application that supports multiple MS Office, Scanned Images and Engineering file formats that enables specialized training.
- Zoom In/Out and Rotate functionality
- Instructors can schedule the class meeting date and participants
- Meeting achieving and playback features.

[Class Announcements ]

## Interactive Learning Sessions

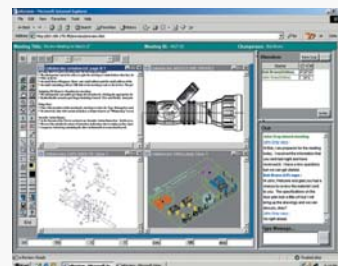

Real time interactive participation by the learner using the tools such as chat, audio/video conferencing, desktop sharing and whiteboard.

- Real-time group interaction with tools for markups for power presentations.
- Provides a meeting management , document view and collaboration environment.
- Learners can rapidly upload a file for collaboration and viewing.
- Instructors can prepare instant quiz while in the conference session.

## Web-Cast Learning Sessions

Learner can watch the web cast of the training sessions. These sessions are initiated by the Instructor, and can be joined but the Learner can not perform all other interactive mode functions.

- Learner can only chat and see all the actions in the online class session.
- No additional plug-ins required.

[ Interactive Learning ]

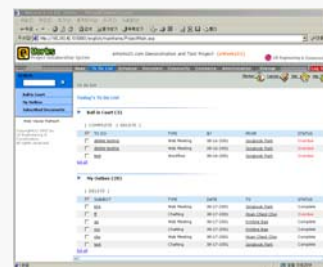

## Announcements

This module contains the course announcements posted by the course instructor. This will also list the upcoming events and news.

- Shows notices for the course.
- Links to useful website for course reference

## Tasks/Assignments

E-Learning allows the Instructors to create and post assignments online. This will be shown the Tasks/Assignments page. Learners also submit their work online and can also attach documents and comments.

[ Tasks/Assignments ]

## Message Boards

An online Message can be created for exchanging information. Learners can create and participate in discussions, allowing better interactions and debates.

## My Grades

Instructor can post the grades of the registered students. Learners can view their grades for all the registered classes.

- Listing of recent grades, also past performance results will be available.
- Class performance indices.

[ Message Boards ]

## Schedule / Calendar

E-Learning enables the learner to effectively manage his or her schedule, whether it is study related or personal.

- Appointments and Tasks can be easily created and managed
- Appointments can be e-mailed to another user if required.
- Reminder functionality that reminds the user of an upcoming event.
- View events according to day, week, month, or year.
- Print friendly function for printing
- Able to set national holiday of different nations
- Able to edit Appointments and Tasks.

## Directory

The directory of the registered course users and groups is available.

- A user can be searched using the user name
- Shows information about a particular user
- Able to search for a particular group
- Shows information about a particular group
- An e-mail can be sent by clicking on the e-mail address on the displayed user information

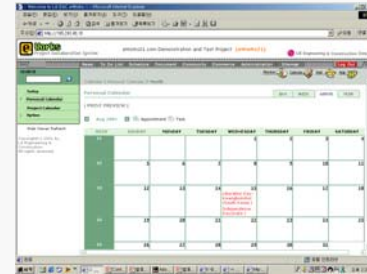

## E-Mail

For effective communications with learners, e-Learning has its own e-mail system that can be linked with other e-mail systems.

- Basic e-mail functionalities
- A reserved e-mail space for each user and ability to manage it.
- An effective address book
- Mail from other e-mail systems can be viewed
- A vacation message that can be sent if a user is not present.
- Received mail can be forwarded to a different e-mail address
- Signature can be attached as a picture files.
